

EXPERIENCE SUCCESS

Change can be frightening... or profitable...

In today's farming environment, now is the time to change your practices, improve your soils, and improve your bottom line. Walnut Creek Seeds has the experience to make you successful adding cover crops in your rotation.

Walnut Creek Seeds is a family affair built around David Brandt's 40+ years of work in no-till and cover crop regenerative farming.

Our mission is to provide farmers with tools to reduce input costs and improve crops and soil.
